

M KARTHIK

Front End Developer

7288992271

karthikbabu1313@gmail.com

PROFILE SUMMARY

Experienced Front-End Developer with **4+ years** of expertise in building responsive web and mobile applications. Proficient in **React.js** (Redux, React Router, React Hook Form), and **Next.js** for server-side rendering and static site generation. Skilled in modern **JavaScript (ES6+)**, **HTML5**, **CSS3**, **SASS**, and frameworks like **Bootstrap** and **Material-UI**. Experienced in **Webpack** for module bundling and micro frontend architecture using **monorepo strategies**. Adept at API integration (**Axios**, **REST**, **GraphQL**) and implementing payment gateways (**RazorPay**, **MultisafePay**). Committed to **WCAG accessibility standards** and optimizing performance. Familiar with tools like **GitHub**, **Bitbucket**, **VS Code**, **Figma**, **Adobe XD**, and platforms like **Magento** and **Adobe Experience Manager (AEM)**. Brings a focus on scalable solutions, clean code, and exceptional user experiences.

SKILLS

Platforms: Adobe Commerce (Magento 2), Adobe Experience Manager (AEM)

Programming & Frameworks:: JavaScript (ES6+), React.js, React Native, Next.js, Redux, React Router, React Hook Form, SASS

Web Technologies: HTML5, CSS3, Bootstrap, Material-UI, REST API, GraphQL, Webpack, WCAG Accessibility Standards, Micro Frontend Architecture (Monorepo)

Tools: GitHub, Bitbucket, Visual Studio Code (VS Code), Figma, Adobe XD

Payment Integration: Razorpay, Multisafepay

EXPERIENCE

Front end Developer, KPMG India Pvt Ltd, Bangalore

(04/2024) - Present

Technologies: Adobe Experience Manager (AEM), HTML/CSS, JavaScript, jQuery, React JS, REST API.

- Optimized Performance and Accessibility for Asian Paints eCommerce:Enhanced WCAG Accessibility Standards and fine-tuned Core Web Vitals (LCP, FCP, CLS), achieving measurable performance improvements.
- Conducted audits and implemented changes to significantly boost platform speed and responsiveness.
- Developed Go Indigo Flight Booking Application:Built a robust flight booking app with React.js and Adobe Experience Manager (AEM), integrating Micro Frontends within a Webpack 5 monorepo architecture.
- Streamlined shared component management and improved team collaboration
- Created Modular Components with Storybook:Designed reusable components for a unified Design System, ensuring consistency and maintenance efficiency.
- Established Scalable CSS Architecture:Implemented BEM methodology for maintainable, consistent styling and simplified future development.
- Worked on bug fixing and new feature implementation for the hotel booking module, contributing to enhanced stability and user experience.

Frontend Developer, Navabrind IT Solutions Pvt Ltd, Bangalore

(04/2022) - (04/2024)

Technologies: Adobe Commerce (Magento 2), HTML/CSS, JavaScript, React JS, REST API.

- Projects Worked on Promofit, Expofit, TexHub: Developed and optimized e-commerce platforms, focusing on responsive UI, seamless payment gateway integration, and performance improvements for an enhanced user experience.
- UI Development: Designed and implemented user interfaces, creating reusable React components to ensure consistency and maintainability across the application.
- API Integration: Integrated RESTful APIs into the application, managing data flow and ensuring effective communication between the front-end and back-end.
- Client Collaboration: Attended client meetings to gather and clarify project requirements, translating client needs into actionable development tasks.
- Bug Fixing: Identified, diagnosed, and resolved bugs to ensure a smooth and reliable user experience, improving overall application stability.
- Feature Development: Developed and integrated new features based on project specifications, enhancing application functionality and user engagement.
- Project Setup: Managed initial project setup and configuration, leading team efforts to establish development environments and workflows from scratch.
- Payment Gateway Integration: Implemented and integrated payment gateways, ensuring secure and seamless transaction processing within the application.

Web Designer, Comx Softech Pvt Ltd, Bangalore

(09/2020) - (09/2021)

Technologies: HTML/CSS, JavaScript, React JS, REST API.

- Project Worked Swaminathan & Co: An e-commerce application developed to sell a wide range of temple pooja materials, including items made of brass, copper, pure silver, silver-plated, pure gold, and gold-plated materials.
- Developed Reusable Components: Created and maintained reusable React components to ensure consistency and efficiency across multiple application pages.
- State Management with Redux: Implemented state management solutions using Redux, effectively handling application state and ensuring seamless data flow.
- Responsive Design: Designed and developed responsive web pages that are compatible with all major browsers and devices, enhancing user experience across platforms.
- Front-End Technologies: Created and styled web pages using HTML, CSS, and Bootstrap, translating design requirements into functional, visually appealing user interfaces.

EDUCATION

Sri Venkateswara University

Tirupati

• B.Com (Computer Applications)

Graduation Year (2019)

HOBBIES

Continuous Learning – Keen on exploring new tools and technologies to stay updated and enhance skills. Skill Upgrade – Focused on mastering the latest features to maintain proficiency.
